HOTOU NJIOWOUO MORELLE OLIVIA

Software Engineer

⚲ Buea, Cameroon ✉ hotoumorelle@gmail.com ☎ +237 682-096-246

PROFILE

Skilled and fast-learning Software Engineer with 2+ years experience developing and optimizing applications. Proficient in Agile methodologies, debugging, and ensuring system compatibility. Strong collaborator and effective team leader, committed to delivering high-quality software solutions.

WORK EXPERIENCE

Mar 2022 – present
Buea, Cameroon

Software Engineer, *Go-Groups LTD*

- Participated in the development of a school management system which includes features such as payment of fees, course registration, view results and transcripts and many others.
- Debugged existing software applications to correct errors, enhance performance, and ensure compatibility** with new hardware platforms, resulting in a 20% increase in system efficiency.
- Collaborated with systems analysts and programmers to design scalable systems, utilizing Agile methodologies and SCRUM practices to gather critical project requirements, limitations, and performance benchmarks.
- Conducted comprehensive analysis of user needs and software requirements, employing UML diagrams and feasibility studies to determine the viability of design within time and cost constraints, leading to on-time, on-budget project completion.
- Led a team of programmers in code reviews, continuous integration/continuous deployment (CI/CD) processes, and version control using Git, ensuring high-quality deliverables and fostering a collaborative development environment.
May 2021 – Feb 2024
Buea, Cameroon

Book Keeper, *Game Hause*

- Classified, recorded, and summarized numerical and financial data to maintain accurate financial records, using both manual journals and automated ledgers, leading to streamlined financial reporting.
- Processed and reconciled cash, checks, and vouchers, ensuring timely deposits and accurate banking records, contributing to effective cash flow management.
- Utilized computerized financial information systems to respond to general inquiries and specific account-related questions, providing clear and concise financial insights to stakeholders.
- Calculated costs of materials, and other expenses using detailed estimates, quotations, and price lists, supporting accurate budgeting and financial forecasting.
